

GREAT SMOKY MOUNTAINS NATIONAL PARK

The nation's most visited National Park, with 16 peaks higher than 6,000 feet in elevation, is part of the Southern Appalachian Mountain Range. With dimensions roughly 70 miles east to west and 8 miles north to south, the area is bounded on the east by the Pigeon River and on the West by the Little Tennessee River. These rivers, which have eroded deep swathes through the mountains, run more-or-less westerly and eventually empty into the Mississippi River.

Scenic vistas in this natural wonderland attract thousands of visitors each day. Take the eleven mile Cades Cove Loop to view wildlife and historical pioneer homes from the past. Visit the observation tower on the summit of Clingmans Dome. Situated at 6,643', Clingmans Dome is the highest point in the Great Smoky Mountains National Park and the third highest mountain east of the Mississippi.
